

Refined Dynamical Theories of Beams, Plates and Shells and Their Applications

Filesize: 6.39 MB

Reviews

Merely no terms to spell out. It really is rally exciting throgh reading through period. Your daily life period is going to be enhance as soon as you complete looking over this ebook.

(Yvette Marquardt)

REFINED DYNAMICAL THEORIES OF BEAMS, PLATES AND SHELLS AND THEIR APPLICATIONS

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the Euromech-Colloquium 219 | As is known, classical theories of vibration of the most frequently encountered structural elements (e. g. , beams, plates and shells) disregard the effects of the shear deformation and rotary inertia. Refined theories, with these effects taken into account, have been pioneered by Bresse, Lord Rayleigh, Timoshenko, Eric Reissner, Mindlin and others. These refined theories have been fruitfully applied in recent decades in both theoretical and practical solid mechanics problems. The European Mechanics Committee approved holding EURO-illCH Colloquium 219 on "Refined Dynamical Theories of Beams, Plates and Shells and Their Applications" for reviewing the recent developments, providing guidelines for future investigations and presenting a forum for current work of younger researchers. The Colloquium was held during September 23 - 26, 1986, at the Universitat-Gesamthochschule Kassel, in the city of Kassel, Federal Republic of Germany. 45 Representatives of academia and industry, from nine European countries, as well as from Israel, USA and India participated in this Colloquium. IV 36 lectures were presented during the five sessions: Session A: Theory of Vibrations of Plates and Shells Session B: Various Approaches for Dynamical Problems of Beams Session C: Random Vibrations and Dynamic Stability Session D: Vibrations of Composite Structures Session E: Special Dynamical Problems of Beams, Plates and Shells The papers in this volume were divided into two parts: papers of invited keynote lectures and those of the invited contributed lectures. | Invited Keynote Lectures.- From Newton's Fluid to the Theory of Plates.- On a Certain Mixed Variational Theorem and on Laminated Elastic Shell Theory.- A Note on the Derivation of Higher-Order Two-Dimensional Theories of Transverse Bending of Elastic Plates.- A General Transverse Shear Deformation Theory of Anisotropic Plates.- Component Mode Synthesis of Multi-Rotor Systems.- Dynamic Stability...
