A doomed journalist travels to Iceland to destroy a Soviet superweapon Halfway between the United States and the Soviet Union, Iceland is one of the most strategic points in the Cold War. And home to a NATO squadron that could wipe Moscow off the map in an instant, it s about to become the unwitting host for the most daring operation in military history. On the remote coast of this frost-bound island, the Soviets are building a laser powerful enough to bring the United States to its knees. They call it Valkyrie, and once it s operational, the free world will no longer be free. When an exiled East German scientist notices a suspicious drain on the Icelandic electrical grid, the KGB sends an assassin to protect their superweapon. Halting the madness falls to Jack Spencer, an American journalist with a terminal disease which may kill him before he gets a chance to save the world.
