

# A text-book of dental pathology and therapeutics for students and practitioners

By Henry H. Burchard

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 266 pages. Dimensions: 9.7in. x 7.4in. x 0.6in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: . . . the tail occurred in forty-eight hours. The action of arsenic appeared somewhat accelerated when a glass ring was applied close to the root of the tail. In more than forty cases there was not one in which the action of the arsenic extended beyond the ring, and the action was not appreciably affected by enclosing the tails in plaster casts. The action of the arsenic is of a progressive nature, beginning at the point of application and extending gradually in each direction. 1 Dental Cosmos. 1894. Flagg1 devitalized ten pulps and removed them, cut off the portion of the bulb of each which had contact with the arsenic, and tested the ten pulps together by Reinsch's test. Arsenic was found, estimated at a one-hundred-thousandth part of a grain, or one-millionth of a grain for each pulp. Prinz has later confirmed this. Allowing for possible...
